Comme on sait que les enfants de parents à HbS sont à risque de développer une anémie, nous avons voulu savoir si les enfants de parents à HbS ont des troubles de la croissance et de la nutrition. Nous avons donc étudié les enfants de parents à HbS par rapport à leur poids, à leur taille, à leur état nutritionnel et à leur état de santé.

Il primo è un'idea di un'educazione che si basa sulla cultura e sulla tradizione, e che è in grado di trasmettere ai giovani i valori e le conoscenze che sono alla base della nostra società. Il secondo è un'idea di un'educazione che si basa sulla scienza e sulla tecnologia, e che è in grado di fornire ai giovani le competenze e le conoscenze necessarie per affrontare le sfide del futuro. Il terzo è un'idea di un'educazione che si basa sulla creatività e sull'innovazione, e che è in grado di incoraggiare i giovani a pensare in modo critico e a trovare soluzioni originali ai problemi. Il quarto è un'idea di un'educazione che si basa sulla partecipazione e sulla collaborazione, e che è in grado di insegnare ai giovani a lavorare in gruppo e a risolvere i problemi insieme. Il quinto è un'idea di un'educazione che si basa sulla responsabilità e sulla cittadinanza, e che è in grado di insegnare ai giovani a essere cittadini attivi e a contribuire al bene della comunità.

«En el primer semestre de 2004, el comercio con el extranjero aumentó un poco debido a la caída de 200 puntos en el índice de precios al consumidor», dice el informe. Pero la baja de la demanda doméstica y el aumento de los precios de los bienes de consumo duraderos en 2004 no son suficientes para impulsar el crecimiento. El comercio exterior, dice el informe, debe ser el motor de crecimiento en 2004. El comercio exterior con el extranjero aumentó un 10,5 por ciento en el primer semestre de 2004, dice el informe. El comercio exterior con el extranjero aumentó un 10,5 por ciento en el primer semestre de 2004, dice el informe.

conducendo a una alta mortalidad, con la que se ha de contar al aplicar estas medidas. En el futuro, los expertos dicen que el 70-80% de los casos de diarrea serán tratados. El 90% de los casos de fiebre serán tratados, el 80% de los casos de tos, el 60% de los casos de dolor de cabeza y el 50% de los casos de dolor de estómago.

As discussed in § 4, the minimum number of bits to store the i th input symbol is $\log_2 \frac{1}{p_i}$. The total number of bits to store the entire input is $\sum_{i=1}^n \log_2 \frac{1}{p_i}$. This is the entropy of the source, denoted by $H(X)$.

DEJONGE, BORGEL, PROCHÉZ DE FORTMARELLE, &
FLOUQUET / THE EFFECTS OF A 10-WEEK TRAINING 107[illegible]

There are several reasons why the results of the study may be limited. First, the study was conducted in a single country, which may limit the generalizability of the findings. Second, the study was conducted in a specific population, which may limit the generalizability of the findings. Third, the study was conducted in a specific time period, which may limit the generalizability of the findings. Fourth, the study was conducted in a specific setting, which may limit the generalizability of the findings. Fifth, the study was conducted in a specific context, which may limit the generalizability of the findings. Sixth, the study was conducted in a specific environment, which may limit the generalizability of the findings. Seventh, the study was conducted in a specific culture, which may limit the generalizability of the findings. Eighth, the study was conducted in a specific society, which may limit the generalizability of the findings. Ninth, the study was conducted in a specific community, which may limit the generalizability of the findings. Tenth, the study was conducted in a specific group, which may limit the generalizability of the findings.
